Old Black Wood

## GUILIN STONE

106-801/ S (for 60cm.aquarium)

GUILIN STONE is a three stones set which allows to easily create the Iwagumi layout. As the stones are attached to each other, you can obtain a real Iwagumi simply.

• Available in sizes: S, M, L.

## MANTEN STONE

106-814/ 20 Kg

MANTEN STONE is one of the most beautiful aquarium stone, thanks to its multitude of forms and the variety of the colours. They are collected at high elevations from a remote mountain chain.

### FUJI ROCK

106-601 / assorted S M L  
106-602 / XL

FUJI ROCK is a selected volcanic rock in very nice shapes. Combining the different sizes and tightening the Java moss on part of their surfaces it's possible to obtain a layout inspired to natural Japanese landscapes.

### PLANT POT

106-301 / S size  
106-302 / M size  
106-303 / L size

Porous volcanic rocks with an hole in the centre to position a plant. Covered with moss, thanks to absorbency of water, they will shortly become nice decorations.

### SEIRYU STONE

106-812

SEIRYU STONE is a grey stone with sharp edges and crevices. It's best used with low growing plants (Glossostigma and Eleocharis).

### OHKO STONE

106-813

OHKO STONE has an irregular surface, quite unique, which highlight every piece. This stone is usually combined with stem plants in the background.

### SHOU STONE

106-811

SHOU STONE is a brown - reddish stone for mixed plants species layouts.

### OLD BLACK WOOD

106-206 / S size  
106-207 / M size  
106-2068 / L size

OLD BLACK WOOD are dark brown branches collected from the central part of Rio Negro. It's the best driftwood to realize gorgeous underwater layouts like the Amazon forest.

• Not be boiled.
